

BRUCE HOWARD &
ASSOCIATES, INC.

Landscape Architects, Site Planners
& Golf Course Designers

Bruce Howard & Associates, founded in 1972, is a full service Landscape Architectural, Site Planning firm. We have extensive experience in large scale, mixed use developments incorporating all types of densities of housing, retail, hotel and resort design, golf course and park landscape design. Working closely with our clients, we have been instrumental in the development of project identities, site evaluations, and preservation of native habitats, comprehensive master planning, and thorough working drawings with "hands on" site supervision. Willing to accept the most challenging assignments, our commitment to the established goals, time and budgetary

constraints is well documented in our clientele's successes. We have participated in projects ranging in size from 200 acres to 15,000 acres, at various locations in the United States and Caribbean, and are recipients of a multitude of design awards, including "Best Residential Large Scale Community in the U.S." from the Urban Land Institute for our Bonita Bay project.

Our diverse project experiences makes us uniquely qualified to create an exciting and distinctive environment, with a homogenous character in all facets of the community. Our seamless integration of the various product types into the site's best natural features, gives our communities a permanence and desirability appealing to all perspective purchasers. Creative paving, site lighting, and innovative landscaping are all accomplished in an energy efficient, state of the art manner.

A design firm's success can be measured in many ways, but we at BHA take great pride in knowing that we have met or exceeded our client's, and surrounding community's expectations as well as fulfilling the project's environmental goals. We would love to hear from you and help imagineer the community of your dreams. A complete photo library and resume of our work is available upon request.

RITZ CARLTON MEMBERS GOLF CLUB - ▲
Sarasota, Florida

A stand alone 200 acre golf course and clubhouse property, for the Ritz Carlton Condominium owners and hotel guests. Recognized by Audubon International for its environmental excellence, this award winning Tom Fazio golf course combines colorful under-plantings with specimen native trees. The scenic entry drive winds through the adjacent Preserves and is augmented by a naturalistic waterfall and accompanying stone signage walls. Entry gates, Guardhouse and Clubhouse all feature the same cut stone veneer, and the elevated club offers breathtaking views of the starting and finishing holes.

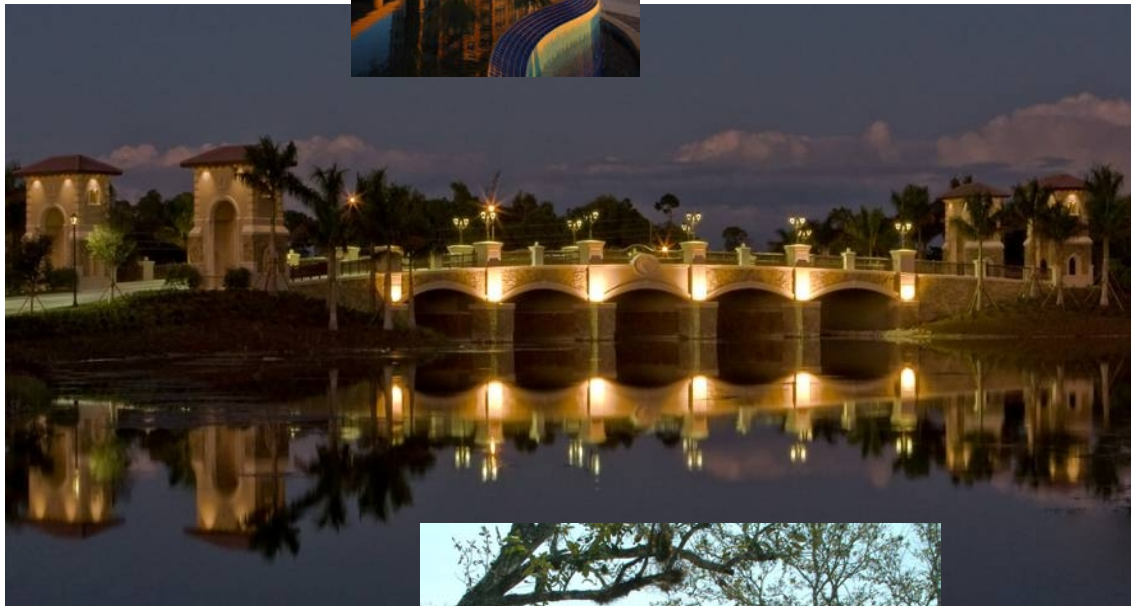

▲ **ESTUARY** Naples, Florida. A 358 acre ultra high end resident / golf course community that artfully blends the entire palette of materials available to the landscape architect. The two intricately conceived main entries feature a five color paving scheme, stone walls, trellises, multiple water features and colorful plantings. Each neighborhood entry, named after local wildlife, has bronze sculptures artfully sculpted by the renowned sculptress, Kathy Spalding. The Bob Cupp designed golf course has a man-made bird sanctuary that has become home to multiple species of water fowl and other aquatic wildlife. All of BHA's southwest coast communities utilize re-use water for irrigation, reducing the demand for sometimes scarce potable water.

**▲ ESPERIA
CONDOMINIUM**

Bonita Bay, Estero, Florida

One of eight condominium projects we completed for the Lutgert Companies in the award winning Bonita Bay Community. The free flowing pool and deck form the centerpiece between the north and south towers. The multi-color paving bands continue from the pool deck onto the mid level roof top gardens forming a visually striking collage when viewed from the adjacent towers.

TREVISOBAY - Naples, Florida ▲

This 1,100 acre community in southeast Naples promises to raise the standard for environmentally sensitive state of the art developments. The elaborate entry and "landmark" bridge lead to the Tuscan style gatehouse which initiates the 3 ¼ mile long "Ille Caminata" spine road and linear park system. A variety of parks with a myriad of fountains and flowering plants highlights the journey through the residential neighborhoods, ultimately concluding with a meandering drive through the "Preserve" area to the TPC Clubhouse and Golf Course.
